

TAKE CARE OF YOUR SHOWCAVE

Why maintain my ShowCave?

Maintaining your ShowCave is important. It helps to ensure proper operation, reduce power consumption and extend its life.

INTERNAL CLEANING (Recommended)

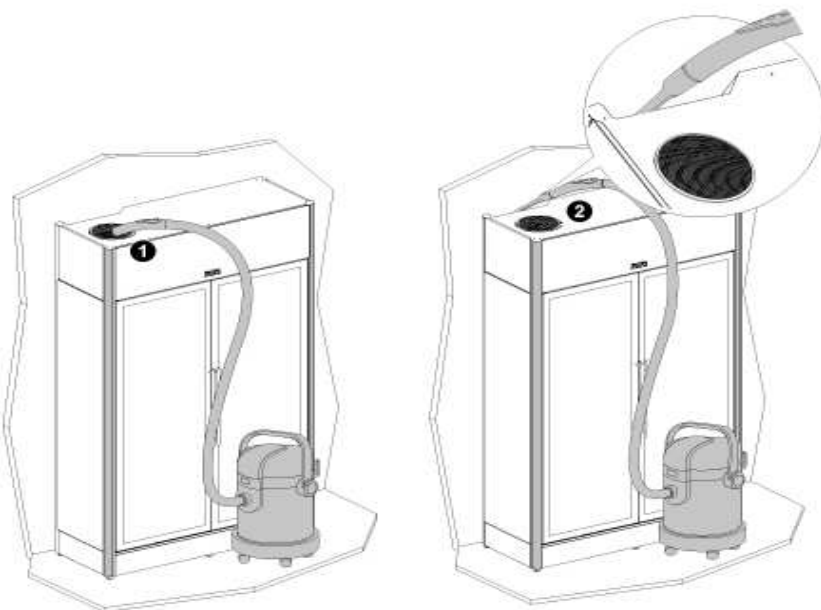

- Stop the unit by pressing the On/Off switch on the left-hand side of the controller and unplug your ShowCave
- Use a soft cloth or sponge with water to clean the central panel
- Clean the mirror with glass cleaner
- Plug the unit back in and switch it on by pressing the On/Off switch

*To do
once a
year*

CLEANING THE COOLING SYSTEM (Imperative)

- Stop the unit by pressing the On/Off switch on the left-hand side of the controller and unplug your ShowCave
- Clean both grids, air inlet and outlet, using a vacuum cleaner. This cleaning is done from the top of the ShowCave
- If the cooling coil is very dirty: remove the top sheet metal to make the cleaning easier
- If in the presence of tubing, check that the pipes and grids are clean
- Plug the unit back in and switch it on by pressing the On/Off switch

*To do
once a
year*

Flush-fitting:

If your ShowCave is built in, ensure easy cleaning of the grids by providing access to perform maintenance work.

Did you know?

EuroCave has the "Origine France Garantie" label
